Remote learning surveys

In case you missed the year group email last week, below are the links to our survey of remote learning. It is helpful to get a range of views on how remote learning is going, in case there is anything to improve, so please do complete this if you are able.

EPQ Survey

We have a number of students who are carrying out surveys for their EPQ and would welcome responses from adults. If anyone has time to complete any of the surveys I am sure the students in year 12 would be most grateful. Click on the title to access the survey.

NEW Phoebe Rockett – [Subject Exploring the effects of Capital Punishment](#). Phoebe writes:

'My EPQ is exploring the effects capital punishment would have if it was reintroduced to the UK, and will include the thoughts and opinions of people completing the survey. This survey is anonymous so please ignore the box at the top telling you to write your name'.

Martha Burnett-Cooke – Subject: [How are attitudes, behaviours and opinions changing because of the Covid-19 pandemic](#) This is a second survey by Martha to test further changes since survey 1

Lewis Bennett – Subject: [the impact of video games](#) Lewis writes, *"I am currently studying how violent video games effect the brain for my EPQ project. If you could fill out the survey and be as honest as possible it would mean a lot as it helps me gather information for my final write up. Furthermore, if you have any questions feel free to leave me a message on my email and I'll get back to you".*

Yours sincerely
